## Definitions and calculation guidelines

## Definitions and Recording Criteria

Below are the definitions and recording criteria used by Central Pattana Plc to calculate, collect and report occupational health and safety statistics:

- Work-hours Total number of working hours.
- Work-related fatalities as a result of injuries that occur from work or activity of the Company.

 loss or removal of an organ, as well as restricted work activity or death. MTIs do not include the following:
- First aid
- Medical visits for the purpose of observation or consultation
- Diagnostic procedures including x-rays, ultrasound, blood tests, prescription medication solely for diagnostic purposes (e.g., mydriatics)
- High-consequence work-related injuries Work-related injuries that result in time away from work where a full recovery cannot be made within 180 days.
- Lost Time Injury Frequency Rate: LTIFR The rate of work-related injuries that result in time away from work.
- Days Away/Restricted or Transfer Rate: DART The rate of work-related injuries and diseases that result in time away from work, restricted work activity or job transfer.
- Lost Workday Rate: LWR The rate of work-related injuries and diseases of high-consequence that result in time away from work where a full recovery cannot be made within 180 days.
- Occupational IIIness Frequency Rate: OIFR The rate of occupational illnesses that result in time away from work.

## Method for Calculating Work-Hours

- Number of employees work-hours
= Working hours (hour) = Number of worker x scheduled workday x number of working hour per day

## Calculation Guidelines

- Rate of fatalities as a result of work-related injuries _ number of fatalities as a result of work - related injuries $\times$ [200,000 or 1,000,000] number of hour worked
- Rate of high-consequence work-related injuries (excluding fatalities) $=\underline{\text { number of high }- \text { consequence work }- \text { related injuries (excluding fatalities) } \times[200,000 \text { or 1,000,000 }]}$ number of hour worked

## - Rate of recordable work-related injuries

$=\underline{\text { number of recordable work }- \text { related injuries } \times[200,000 \text { or 1,000,000 }]}$
number of hour worked

- Lost-time injuries frequency rate: LTIFR
$=\underline{\text { number of Lost }- \text { time injuries frequency } \times[200,000 \text { or 1,000,000] }}$
number of hour worked
- Lost-time injuries frequency rate: OIFR
$=\underline{\text { number of Lost }- \text { time Occupational illness frequency } \times[200,000 \text { or } 1,000,000]}$
number of hour worked
- Days away/Rrestricted or Transfer rate: DART
$=\underline{\text { Total Number of Days away/restricted or transfer from injuries and illness } \times[200,000 \text { or 1,000,000 }]}$
$=$ number of hour worked
- Lost Workday Rate: LWR
$=\underline{\text { Total Number of Lost Days from injuries and illness of high }- \text { consequence work } \times[200,000 \text { or } 1,000,000]}$
- Absentee Rate: AR
$=\underline{\text { Number of lost day injuries and other occupational diseases that are not excused } \times 100}$
Total number of operating day in a year

## Remarks

 Unilever House Grand Rema 9.

- In 2021, we expanded our reporting boundary further to cover contractors including housekeepers and security guards, which have been included since 2020

## ENRICHED ENVIRONMENT

 operational costs, mitigates regulatory and physical risks, and creates value for its stakeholders

## Energy

|  | Data coverage per square meter of portfolio | \% | 89.40 | 89.40 | 76.00 | 94.54 |

## Definition and calculation guidelines

## Energy

Total Energy consumption is including energy from fuel combustion, electricity, and renewable energy.

- Total fuel consumption = the sum of all types of fuel resource consumption $x$ its heating value (in each) - Unit in GJ
- Conversion Factor are referred from to the Annual Thailand Energy Report, Department of Alternative Energy Development and Efficiency
- Electricity consumption $=$ The sum of electricity used (in kWh$) \times 3.6$ (Unit: GJ)
- Total Energy consumption within organization = Fuel consumption from non-renewable + renewable energy + Electricity purchased - Electricity sold to tenants

## Intensity

- Emission intensity calculate per gross leasable area (GLA). The GLA is including leasable area and common areas.

| GRI Standards | Metrics | Unit | 2018 | 2019 | 2020 | 2021 |

|  | Direct, indirect, and other indirect emission of greenhouse gas (Scope $1 \& 2 \& 3$ ) per unit area | $\mathrm{kg} \mathrm{CO} 2 \mathrm{e} / \mathrm{m}^{2}$ | 78.78 | 80.01 | 63.24 | 55.67 |
|  | Data coverage per square meter of portfolio | \% | 89.40 | 89.40 | 76.00 | 94.54 |

## Definition and calculation guidelines

## Greenhouse Gas

Reporting scope of GHG emissions covers $\mathrm{CO}_{2}, \mathrm{CH}_{4}$, and $\mathrm{N}_{2} \mathrm{O}$ which are calculated and shown in the form of $\mathrm{CO}_{2}$ equivalent that generates Global Warming Potential (GWP) specified by Intergovernmental Panel on Climate Change 2006 (IPCC) Meanwhile, the figure of emission factors is referred from IPCC and Thailand Greenhouse Gas Management Organization (TGO)

## 1. Scope Boundaries

1.1 Direct emission (Scope 1) occurs from fuel or natural gas combustion refrigerant, fire extinguisher $\left(\mathrm{CO}_{2}\right)$ and Sulfur Hexafluoride ( $\mathrm{SF}_{6}$ ) through operating processes and activities under the Company's monitoring, control, and management.
1.2 Indirect emission (Scope 2) occurs mainly from electricity, bought from external sources for Central Pattana's operations only.
1.3 Other indirect emission (Scope 3) occurs from water usage, electricity usage by tenants and fuel by business travel (staff travels by taxis, airplanes, train, boat, and car rent), LPG usage by tenants including waste treatment and transportation outside the Company.

## 2. Report on Emission

2.1 Direct emission (Scope 1) is based on fuel consumption (by weight or quality), e.g., the quality of oil or natural gas $\times$ GHG emission rate, as suggested in the 2006 IPCC guidelines.
2.2 Indirect emission (Scope 2) occurs mainly from electricity, bought from external sources for Central Pattana's operations only.
2.3 Other indirect emission (Scope 3) occurs from water usage, electricity usage by tenants and fuel by business travel (staff travels by taxis, airplanes, train, boat, and car rent) including waste treatment and transportation outside the Company.
3. Assessment Method according to The Greenhouse Gas Protocol: A corporate accounting and Reporting Standard Revised Edition and Thailand Greenhouse Gas Management Organization (TGO) guideline for carbon footprint assessment.

## Intensity

- Emission intensity calculate per gross leasable area (GLA). The GLA is including leasable area and common areas.

Remarks

- CPNREIT has invested in properties, but not the operator. GHG emissions data in this report had been collected by Central Pattana as a Property Manager. GHG emissions from facilities in which CPNREIT has invested are estimated based on Central Pattana shareholding proportion in CPNREIT which are $26.69 \%$ by 2020 and $30.28 \%$ by 2021.

|  | Data coverage per square meter of portfolio | \% | 89.40 | 89.40 | 76.00 | 94.54 |

## Definition and calculation guidelines

Waste covers total waste generated through Central Pattana's operartions and activities. The quantity of waste is based on valid estimation

- Waste diverted from disposal refers waste is taken for preparation for reuse, recycling and composting offsite.
- Waste directed to disposal refers waste is taken for incineration (with/without energy recovery), landfill offsite.
- Waste generated rate calculated from waste generated per customer visits.
- Waste diversion rate calculated from waste diverted from disposal per waste generated.

## Remarks

- In 2021, we expanded our reporting boundary data includes Central Marina, Central Lampang, the Ninth Towers Grand Rama 9, and Unilever House Grand Rama 9.

# LRQA Independent Assurance Statement <br> Relating to CPN Retail Growth Leasehold REIT's performance data and information for the calendar year 2021 

This Assurance Statement has been prepared for CPN Retail Growth Leasehold REIT (CPNREIT) in accordance with our contract but is intended for the readers of this Report.

## Terms of engagement

LRQA (Thailand) Limited (LRQA) was commissioned by CPN Retail Growth Leasehold REIT's (CPNREIT) to provide independent assurance on its performance data and information in 2021 "the data" against the assurance criteria below to a limited level of assurance and at the materiality of the professional judgement of the verifier using LRQA's verification approach. $\angle R Q A$ 's verification procedure is based on current best practice, is in accordance with ISAE $3000^{1}$ and uses the following principles of inclusivity, materiality, responsiveness and reliability of performance data.

Our assurance engagement covered CPNREIT's activities in Thailand under its financial control where Central Pattana Public Company limited (Central Pattana) acts as the Property manager for The Ninth Towers Building, Unilever house Building, PinKlao office Buildings (Tower A and Tower B), Central Pattaya beach, Central Marina, Central Rama II, Central Rama III, Central Lampang, Central Pinklao and Central Chiangmai Airport only and specifically the following requirements:

- Confirming that the report is in accordance with:
- GRI Standards (2016)
- Evaluating the accuracy and reliability of data and information for only the selected indicators listed below: ${ }^{1}$
- Environmental: (GRI 302-1) Energy consumption, (GRI 302-3) Energy intensity, (GRI 303-3 to 5) Water withdrawal, discharge and consumption (2018 edition), (GRI 305-1) Direct (Scope 1), (GRI 305-2) Energy indirect (Scope 2), (GRI 305-3) Other indirect (Scope 3) GHG emissions, (GRI 305-4) GHG emissions intensity and (GRI 306-3 to 5) Waste generated, diverted form and direct to disposal (2020 edition)
- Social: (GRI 403-9 and 10) Types of injury and rates of injury, occupational diseases, lost workdays, absenteeism, days away/restricted or transfer rate (DART), lost-time injuries frequency rate (LTIFR), occupational illness frequency rate (OIFR) and number of work-related fatalities for all employees and contractors (2018 edition).

Our assurance engagement excluded the data and information of CPNREIT's subsidiaries where Central Pattana is not the Property Management and all its activities outside of Thailand. Our assurance engagement also excluded the data and information of its suppliers and any third-parties mentioned in the report.

LRQA's responsibility is only to CPNREIT. LRQA disclaims any liability or responsibility to others as explained in the end footnote. CPNREIT's responsibility is for collecting, aggregating, analysing and presenting all the data and information within the report and for maintaining effective internal controls over the systems from which the report is derived. Ultimately, the report has been approved by, and remains the responsibility of CPNREIT.

## LRQA's Opinion

Based on LRQA's approach nothing has come to our attention that would cause us to believe that CPNREIT has not, in all material respects:

- Met the requirements above
- Disclosed accurate and reliable performance data and information as no errors or omissions were detected

The opinion expressed is formed on the basis of a limited level of assurance and at the materiality of the professional judgement of the verifier.

Note: The extent of evidence-gathering for a limited assurance engagement is less than for a reasonable assurance engagement. Limited assurance engagemen ts focus on aggregated data rather than physically checking source data at sites. Consequently, the level of assurance obtained in a limited assurance engagement is substantially lower than the assurance that would have been obtained had a reasonable assurance engagement been performed.

[^0]
## LRQ/

## LRQA's approach

LRQA's assurance engagements are carried out in accordance with our verification procedure. The following tasks though were undertaken as part of the evidence gathering process for this assurance engagement:

- Auditing CPNREIT's data management systems to confirm that there were no significant errors, omissions or misstatements in the report. We did this by reviewing the effectiveness of data handling process, and systems, including those for internal verification. We also spoke with key people in various departments responsible for compiling the data and drafting the report.
- Sampling of evidences presented at Central Lampang and Unilever Housebuilding to confirm the reliability of the selected topic specific standards.

## Observations

Further observations and findings, made during the assurance engagement, is:

- Reliability:

CPNREIT has a well-defined data management system to consolidate data and information associated with the selected specific topic standards. Maintaining internal verification processes will continually improve the reliability of its reported data and information.

## LRQA's standards, competence and independence

LRQA ensures the selection of appropriately qualified individuals based on their qualifications, training and experience. The outcome of all verification and certification assessments is then internally reviewed by senior management to ensure that the approach applied is rigorous and transparent.
